

# EMERGENCY MEDICAL RESPONSE COURSE

## Perfect For

This course is intended for individuals who are not EMS or healthcare providers but desire certification in Emergency Medical Response.

## Prerequisites

Current, valid professional-level BLS certification (Basic Life Support). May be incorporated/conducted in conjunction with the Emergency Medical Response program as needed.

## Required for Successful Completion

### Written Evaluation

Required

### Skills Evaluation

Required. Correctly demonstrate how to: Work as the lead responder in a scenario-based team setting to adequately direct the primary assessment and care of: a. Patient Assessment/Management – Trauma, b. Patient Assessment/Management – Medical, c. BVM Ventilation of an Apneic Adult Patient, d. Oxygen Administration by Non-rebreather Mask, e. Cardiac Arrest Management/AED

Successful completion is based on achievement of the core learning objectives rather than a prescribed instruction time.

## Medical Oversight

Training Centers who are certifying public safety personnel (e.g., law enforcement officers, firefighters, corrections officers) in Emergency Medical Response must have physician level (MD or DO) oversight.

## State Licensure and Credentialing of Emergency Medical Responders

State EMS agencies have the legal authority and responsibility to license, regulate and determine the scope of practice of EMS providers within the state EMS system. ASHI's Emergency Medical Response program is designed to train and certify individuals in Emergency Medical Response — not to license or credential — Emergency Medical Responders. Individuals who require or desire licensure and credentialing within the state EMS system must complete specific requirements established by the regulating authority. It is not the intent of ASHI's Emergency Medical Response program to cross the EMS scope of practice threshold.

## Certification Period

2 Years
